- BACKEND WEB DEVELOPMENT

ABOUT

Hello! My name is Rutvik Jani, and I'm a passionate Full Stack Web Developer. With a strong foundation in both front-end and back-end technologies, I specialize in creating dynamic and responsive web applications. My skill set includes HTML, CSS, JavaScript, React, Node.js, Express, and MongoDB, among others. I enjoy turning complex problems into user-friendly solutions and continuously strive to learn and implement the latest web development trends. Let's build something amazing together!

PROJECT

- **Chatify.com**
link: <https://chat-front-khaki.vercel.app/>
chatify.com is the real time chat application which is i made by using react, node, express and mongodb framework. here user can chat with each other by registration of itself with register user only
- **memory.com**
link: <https://rutvikjani03.github.io/memory.com/>
memory.com is basically a game for entertainment purpose only in which i used html, css and javascript languages. this is a emoji card game
- **BuildCon**
link: <https://rutvikjani03.github.io/buildcon/>
buildCon is frontend website for marketing of any architectural company which i made by only use of html and css.
